- D3.3 Strategy paper on early health-technology assessment for advanced therapies
- D3.5 Strategy paper on benefit and requirements mechanistic side studies
- D4.4 Strategy paper on health economics & reimbursement

RESTORE Road Map/Position Paper

3. Strategy for Publication

The above listed documents are under preparation, or have already been submitted to the European Commission funding and tenders portal, taking into account contributions from the RESTORE working groups and inputs from the RESTORE 1st Advanced Therapies Science Meeting, the RESTORE European Parliament Meeting in Brussels and the RESTORE Momentum Workshop. The overall aim is to publish these papers in an open access scientific journal, for example, Frontiers in Medicine. These papers will therefore be available as a resource for the entire scientific community.

All public RESTORE deliverables, not just the strategy and white papers, are (if already submitted to the EC), or will, be made available on the RESTORE website and therefore available to all interested parties. The public deliverables can be found here: <https://www.restore-horizon.eu/public-deliverables/>
